### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Hwang (US2002/0080836).

With respect to claims 1-4, 6-7, and 12-13, Hwang shows in Fig.1-2 a laser comprising: a front mirror 107 and a rear mirror 104-105 being disposed so as to establish a reflective cavity; a gain region 106 disposed between said front mirror and said rear mirror, said gain region being constructed so that when said gain region is appropriately simulated by light from a pump laser, said gain region will

emit light: and said rear mirror having a phase compensated reflector 104 to act as an output coupler for a lasing mode and to reflect pump light at a proper phase so as to provide phase shifted reflected pump light for a second pumping pass through said gain region; wherein said gain region is positioned relative to said rear mirror with said peaks of said reflected pump light in alignment with said gain region during said second pumping pass therethrough; and wherein said gain region is positioned relative to said front mirror and said rear mirror so as to provide pro-lasing (see para. 0044 and 0045).

With respect to claims 5, 8, and 10, Hwang discloses the mirrors comprise DBR (para.0038).

With respect to claims 9 and 11, Hwang discloses DBR comprises InP (para.0038).
